PLEXIMAG

The movement & the exhibition

PRODUCT DESCRIPTION

This is the ultimate state of the art frontier in Plexiglas Exhibitors. If you want to show your products and distinguish your company from all the others please add movement .

Pleximag is a machine in which a series of shelves are arranged all along 2 chains, one for each side. The movement is vertical and the shelves stay always in a horizontal position for optimum exposure of your products.

The solution is completely transparent because it is made all in acrylic material and it is customizable, both in terms of size, shape, color and number of shelves with integrated lighting and start&stop options.

MAIN APPLICATIONS

- Sweets
- Chocolate candies
- Coffee capsules
- Ties
- Socks
- Mechanical bearings & components
